

MEEEMO

WHITEPAPER

About Meemo

We're excited to bring you \$Meemo a token created for the people. While we believe Meme season is fast approaching, we wanted to get our foot in the door and be ready for takeoff.

So, you may ask why should I invest into \$Meemo? Well, that's a great question. We are creating a community driven token that will focus on giving back to its investors. While we have been planning this for some time, we've been in no rush to launch.

We will have many amazing Utilities including Swaps, Meme Predictions, Launch Pad, NFT's and more. While we believe in what we're building we won't try to convince anyone to invest. You need to DYOR as with any project and make the right choice that's best for you.

Okay, so..... what's so special about NFT's you ask? Nothing really for most projects but in this instance, we will have a low mint price and 75% of the funds collected from minting will be going back to the community while the other 25% will be used in other ways to push the project.

We plan to launch a couple collections over time, and they will all have rewards and staking capabilities, but the biggest thing will be the rewards for minting a RARE NFT!

Our first NFT collection will have 5000 unique NFT's with an estimated giveaway amount of over 200K! Prizes will vary from 5K-25K with a GRAND PRIZE (TBD)

Marketing strategy

Rather than focusing on Telegram, Twitter and YouTube influencer's \$Meemo will focus on mass adoption. We will rely on the community to shill on all the respected platforms and your everyday influencer's will get on board when they see our success.

In the meantime, any funds collected from the 1% tax will be held and used for CEX listings. As with any reputable project with enough volume and constant growth some exchanges will list for free, and influencers will promote for free. For this project to be successful we will need OUR COMMUNITY to step up and help spread the word until we raise the funds to start listing on major exchanges.

We anticipate being listed on at least 2 centralized exchanges within the first month and possibly more depending on the volume.

Tokenomics

1 Trillion Total Supply

3% Buy Tax

3% Sell Tax

ERC-20 Type

ETH Network

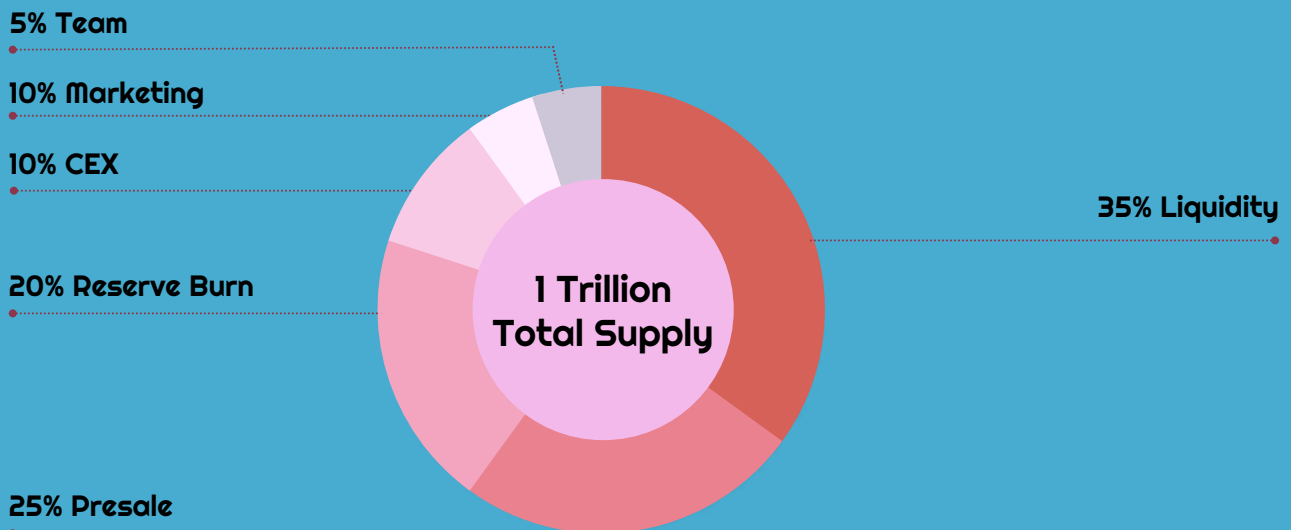

Meemo Token Name

Token Distribution

We have 2 reserve wallets which will be locked for a duration of 30-90 day at a time. The 20% burn reserve will be locked for 3 months at which time it will be burned when the lock expires.

So why are we waiting to burn you ask? Sure, we want to give the project time to build and hit a substantially higher market cap then we will have at launch. Depending on our market cap when it's time to burn this could be a MULTI MILLION dollar burn! We all know what type of excitement this can create while also reducing the total circulating supply and raising the floor! The 10% CEX reserve will be locked in 30-day increments. The reason we are doing 30 days at a time this will allow us to save marketing funds gained over the course of the month to line up exchanges that fits our budget.

We will contact CEX exchanges throughout the month to see who best suits our needs and budget at the given time. Once the lock expires, we will pay the listing fees to the selected exchanges and relock for another 30 days. The remaining token allocation will go to liquidity pool on Uniswap.

Menu Card

Phase 1:

- Fair launch
- Website release
- Social's created
- Community growth
- Coin Gecko listing
- CMC listing
- Update info on Dextools
- NFT development beings

Phase 2:

- Dextools trending
- 2,500 Telegram members
- 1,000 holders
- Community contest
- Initial partnerships
- CEX listings
- Release NFT's

Phase 3:

- 5,000 Telegram members
- 5,000 holders
- Additional CEX listings
- NFT reveal
- Meemo Prediction
- Major partnerships
- Massive Burn

Phase 4:

- Meemo swap
- Meemo LaunchPad
- Additional CEX listings
- 10,000 Telegram members
- 10,000 holders
- Merch gear production

How to buy

Create a Wallet

Download metamask or your wallet of choice from the app store or google play store for free. Desktop users, download the google chrome extension by going to metamask.io.

Get Some ETH

Have ETH in your wallet to swap to \$MEEMO. If you don't have any ETH, you can buy directly on metamask, transfer from another wallet, or buy on another exchange and send it to your wallet.

Go to Uniswap

Connect to Uniswap. Go to app.uniswap.org in google chrome or on the browser inside your Metamask app. Connect your wallet. Paste the \$MEEMO token address into Uniswap, select MEEMO, and confirm. When Metamask prompts you for a wallet signature, sign.

swap ETH for

Swap ETH for \$MEEMO.

FAQs

Why choose \$Meemo?

Many of the Meme Tokens do not have a structured ecosystem capable of accommodating them all. Meemo will provide a comprehensive and quality platform for all Meme Tokens, delivering reliable and fast transactions. As with other coins in the cryptocurrency industry, Meme Tokens require a unique way of relationship building and interacting with each other. Meemo will provide this environment and delivers the best user experience. Our cutting-edge technology will provide all Meme Token owners with the best products via our ecosystem and guarantees a first-class experience for all.

How does it work?

We would select at least two projects to participate in each Meemo Prediction race (usually 2-3 projects when the ecosystem has grown).

Each race will last 30 minutes (To be notified in advance). When the timer expires, the Coin/Token with the highest Growth Rate will win the race. To be fair, we would choose projects with similar percent growth rates.

For example: Meemo Prediction will enable every investor to choose which token will perform better (% variation) during the 5 minutes race. If you choose DOGE and it grows 20% against 10% and 15%, the use will win.

Players will place bets in ETH/BNB on the project they believe would win. Until the race, the whole betting phase would take just 5 minutes. The winners can claim the reward as soon as the results are accessible.

According to the odds, 90 percent of the combined bets on all projects in the race would be split by the winners. 10 percent remaining is distributed to Marketing Fund, or Liquidity Pool.

What is Meemo Launchpad?

We will partner with reputable tokens new and old projects to specifically sell their tokens via the Meemo Launchpad.

Investors may purchase Trending Tokens from selling forms like public-sale, fundraising, or a whitelist ICO, IDO...

In order to use our Launchpad users will be required to hold a minimum amount of Meemo tokens.

Before a project can be eligible to list on our launchpad they must first have an Audit and KYC performed.

This is a great way to bring communities together, strengthen all projects involved while working towards mass adoption.
